

SAP Commerce Cloud audit package by Pearl

Fast and reliable report from Pearl
on how to get your SAP Commerce
solution to the next level.

Audit package by Pearl

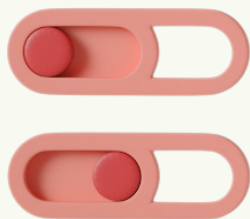

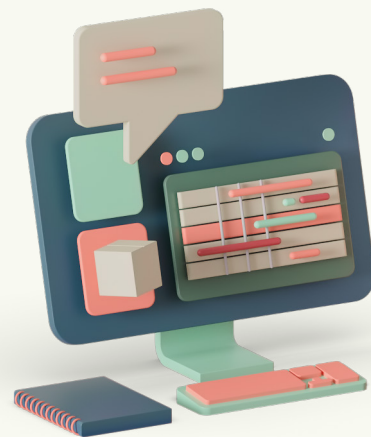

Maximize your SAP Commerce solution ROI

Do you have a feeling that you might have been using only fraction of what SAP Commerce solution offers?

Are you missing full 360° insightful overview before making your next strategic move?

Audit package by Pearl is designed to provide to existing SAP Commerce customers detailed report and recommendations on how to successfully plan and execute their future ecommerce strategy.

Get a fresh view for your eCommerce business from the trusted partner Pearl.

1

TECHNICAL AUDIT

Have your upgrade projects become lengthy and expensive? Do you face constant performance issues and not sure, whether you will survive next Black Friday?

Our certified consultant team will run a detailed technical audit for your SAP Commerce solution. We offer two types of technical audit reports: **Basic** and **Advanced**.

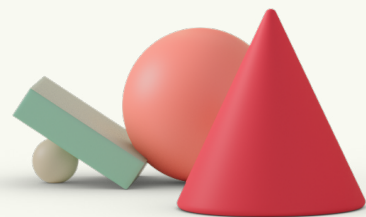

BASIC

- **Code review** (extension structure, items.xml data models, static code analysis, etc.)
- **Deployment architecture review** (infrastructure sizing, deployment management, etc.)
- **Application management review** (data retention, monitoring, release management, patching & upgrading, etc.)

ADVANCED (may be ordered as an add-on to the **Basic** package)

- **Solution architecture review** (catalog structure, catalog synchronization, search, internalization, etc.)
- **Integration architecture** (products, categories, stock, prices, customers, orders, etc.)
- **Security and compliance**
- **Performance and scalability**
- **Manual code review**

Pearl will prepare a detailed report, including executive summary, with the list of recommended actions grouped by priorities.

2 FUNCTIONAL AUDIT

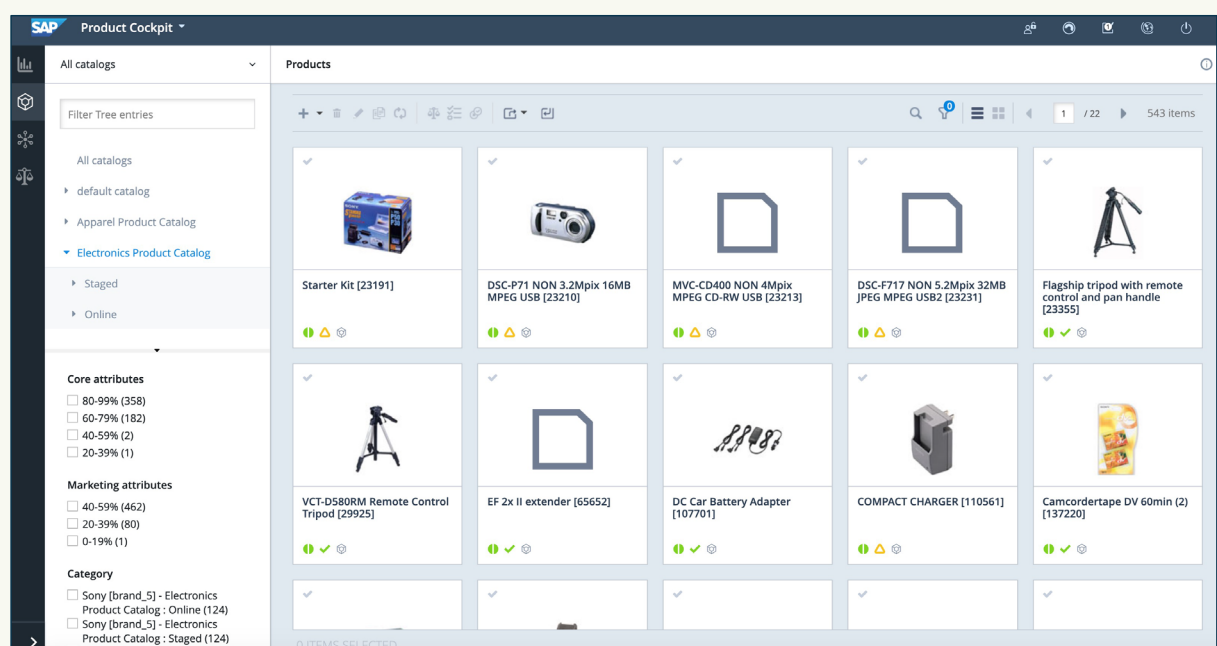

Have you launched your eCommerce store and felt that your innovation pace has slowed down?

Pearl will review to which extent standard capabilities of the solution are being used. All functional areas of SAP Commerce will be reviewed:

- **PIM** (Product Information Management)
- **CMS** (Smart Edit)
- **Customer Support & ASM**
- **Search & Adaptive Search**
- **Order Management**
- **Promotions and Coupons**
- **Storefront**

On the outcome you will receive a detailed report from our advisory team with the list of recommended actions grouped by priorities.

Pearl has successfully retransformed and enabled new business models on top of SAP Commerce capabilities. One of the recent transformations was the enablement of supplier onboarding through SAP Commerce PIM solution.

3 COMMERCE STRATEGY

- ✓ Would you like to move towards headless & composable commerce but don't know where to start?
- ✓ Looking how to split your Commerce solution monolith into manageable microservices and how to enable digital service layer to accelerate Commerce ecosystem growth?
- ✓ Pearl will provide guided step-by-step recommendations to bring your Commerce business to the next level.

4 SAP COMMERCE CLOUD (CCV2) MOVE

SAP Commerce Cloud offers higher flexibility and reliability, reduces costs of operations and simplifies platforms daily use. Would you like to explore migration possibilities for your SAP Commerce on-prem solution?

Our CCV2 MOVE assessment package will help to gain needed confidence and predictability for moving your On-Prem solution to the Cloud.

Pearl will provide detailed CCV2 MOVE assessment report, including:

- **customization review**
- **detailed project scoping** (backlog with estimates and costs)
- **detailed project plan** (milestones & dependencies)
- **identified risks & possible mitigations**

This is an easy and predictable way to explore Cloud migration possibilities for your SAP Commerce solution.

Our experience

Pearl is one of the largest SAP partners in Nordics and Baltics
